

IGNACIO FAYOS GÓMEZ

Backend Developer | PHP · Laravel

PROFILE

Throughout my personal and professional journey, I have developed a strong ability to adapt, which has been especially valuable in my transition into backend development.

My recent experience in real technical environments has allowed me to work with technologies such as PHP, Laravel, and PostgreSQL, contributing to the development of internal solutions, REST APIs, and integrations with external services.

In addition, being part of diverse work teams has helped me build strong communication skills and a collaborative mindset, both of which I consider essential in any technology project.

Overall, I am looking to continue growing as a backend developer, bringing commitment, continuous learning, and a solid technical foundation.
